

Welcome to SÖRAB's facilities!

Private individuals residing in a SÖRAB municipality may dispose of their waste free of charge – the cost is included in their household waste collection charge. Businesses (companies and organisations), however, must pay for waste disposal at SÖRAB's facilities.

Those who do not personally transport and sort their waste are also required to pay. Liability to pay also applies if you dispose of waste items that obviously do not come from your own household.

Since our staff cannot tell where the waste originates from, this assessment will be made based on your vehicle and type of waste. If you bring construction and demolition waste,

garden waste, or hazardous waste (including pressure-treated wood) and arrive in a pickup truck, service vehicle, tractor, foreign-registered car, or with a company trailer, you will be required to pay. Payment must be made before you are allowed to sort and dispose of your waste.

When visiting SÖRAB's recycling centres, your car, including trailer and waste, may not weigh more than 3,500 kg, or carry a volume greater than 3 m³. Heavier or larger cars will be directed to Hagby Recycling Facility in Täby or Löt Recycling Facility in Vallentuna.

Thank you for sorting your waste according to the instructions. Our staff is happy to answer any questions you may have.

Hazardous Waste

The recycling centres do not accept hazardous waste (including pressure-treated wood) from businesses. Businesses are referred to the service desk at Hagby, where you will be required to fill in a declaration for hazardous waste. You will be charged by the kilo. Hazardous waste is not included in the standard charge for an ÅVC visit. Private individuals who bring larger quantities of hazardous waste may also be referred to Hagby and required to pay.

Electronics

The recycling centres only accept smaller quantities of electronics covered by the Product Liability Act from businesses. Those bringing larger quantities will be referred to the service desk at Hagby and required to fill in a declaration. Electronics not covered by the Product Liability Act are not included in the standard charge for an ÅVC visit, but may be disposed of at Hagby for a charge.

Stone, soil, and concrete

Businesses may only dispose of stone, soil, and concrete via the service desk at Hagby or Löt. You will have to certify that the material is free from asbestos or other contaminants and pay by the kilo. Stone, soil, and concrete are not included in the standard charge for an ÅVC visit. They are, however, included in the household waste collection charge for private individuals.

Asbestos

Businesses may only dispose of asbestos at Löt. You will be required to fill in a declaration for asbestos and pay by the kilo. Private individuals may dispose of a maximum of 3 kg asbestos at the recycling centres. Larger quantities will be directed to Löt. All asbestos must be packaged and well sealed, preferably in heavy plastic bags marked asbestos.

Opening hours Hagby and Löt service desks: weekdays 6 AM – 4 PM

Note! When filling in a declaration, waste producer information is required (name, address, corp.ID, phone).

Rates

Single ticket	SEK 500 incl. VAT
10-visit punch-card	SEK 3,000 incl. VAT

Punch-cards can be purchased through our website or over the counter at SÖRAB facilities. Our facilities only accept credit or debit cards (except American Express or Diners). For more information on rates, opening hours, facilities, sorting instructions, general terms and conditions, etc., go to sorab.se

The above rates also apply to private individuals for waste items that rarely or never come from a normal household.

The staff at ÅVC will determine whether or not you are liable to pay. Please respect their decision. In the event of a dispute, our staff has the right to ask you to leave the facility.
